DETAILED ACTION

Response to Amendment

1. The amendments, filed on 08/07/06, have been entered and made of record. Claims 2, 8, 9, 15, 18, 22, 24, 25 and 32 are cancelled. Claims 34 and 35 are added.

Election/Restrictions

2. The restriction requirement species 1 -9, as set forth in the Office action mailed on 06/08/05, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 6, 7 and 16, directed to species 2-9 are no longer withdrawn from consideration because claims 6, 7 and 16 depend indirectly or directly on the allowed claim 1.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1, 3-7, 10-14, 16, 17, 19-21, 23, 26-31 and 33-35 are allowed.
4. The following is an examiner's statement of reasons for allowance:

With regarding claims 1 and 28, the prior art of record fails to teach or fairly suggest, "an image-capturing device comprising:

- an image-capturing element that converts light to an electrical signal;
- a photographic lens member that condenses subject light at the image-capturing element;
- a board on which the image-capturing element is mounted;**
- a vibration detection sensor secured to the board that detects an extent of vibration of the image-capturing device;**
- a position detector having a first member mounted on the photographic lens member and a second member mounted on the board to detect a relative position of the photographic lens member and the board;**
- an elastic member having one end thereof secured to the photographic lens member and another end thereof secured to the board; and**
- a vibration-proofing unit that moves the board and the photographic lens member relative to each other along a direction substantially perpendicular to an optical axis of the photographic lens member in conformance to outputs from the vibration detection sensor and the position detector".**

With regarding claim 21, the prior art of record fails to teach or fairly suggest, “an image-capturing device comprising:

- an image-capturing element that converts light to an electrical signal;
- a photographic lens member that condenses subject light at the image-capturing element;
- a board on which the image-capturing element is mounted;**
- a vibration detection sensor secured to the board that detects an extent of vibration of the camera;**
- a position detector having a first member mounted on the photographic lens member and a second member mounted on the board to detect a relative position of the photographic lens member and the board;**
- an elastic member having one end thereof secured to the photographic lens member and another end thereof secured to the board; and**
- a vibration-proofing unit that moves the board and the photographic lens member relative to each other along a direction substantially perpendicular to an optical axis of the photographic lens member in conformance to outputs from the vibration detection sensor and the position detector”.**

Regarding claims 3-5, 10-14, 17, 19, 23, 26-27, 29, 30, 31 and 33-35, the claims are allowed as being dependent of claims 1, 21 and 28, respectively.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
